## SKILLS

---

**Cloud:** AWS (EC2, VPC, S3, IAM, RDS, CloudWatch, Lambda, Route53, DynamoDB, WAF)

**Networking:** SSH, TCP/IP, HTTP/S, DNS, Load Balancing

**DevOps Tools:** Terraform, Docker, Python, Bash, GitHub Actions

**Others:** Git, Jira, Linux, Squadcast, Grafana, Wazuh SIEM

## WORK EXPERIENCE

---

### Site Reliability Engineer (SRE)

Makati City, Metro Manila

eTap Inc.

March 2025 - Present

- Implemented monitoring solutions using AWS CloudWatch and Grafana, tracking SLIs and SLOs compliance and enabling proactive incident detection sustaining 99.9% service availability.
- Actively participated in 24/7 on-call rotation, triaging production incidents, analyzing logs and metrics, performing root cause analysis (RCA), and driving corrective and preventive actions.
- Automated real-time alerting workflows using Python, Lambda, CloudWatch, and SNS significantly reducing incident detection time by 60%.
- Designed AWS architecture and technical documentation to standardize infrastructure visibility, enhance cross-team collaboration, and improve deployment accuracy.

### IT Analyst

San Fernando, Pampanga

Corporate Guarantee and Insurance Company Inc.

June 2024 - January 2025

- Provided technical support to 100 end-users experiencing issues with the Core Insurance System, ensuring continuation of critical business operations.
- Optimized PL/SQL scripts to support system workflows, automate data processing, and provide reporting for business operations.
- Developed an inventory management system using HTML, CSS, and PHP for tracking and reporting, resulting in a increase in operational efficiency.
- Design complex SQL queries for data extraction, reporting, and analysis, enabling data-driven decisions

## EDUCATION

---

### BS in Computer Engineering

Samar State University

Catbalogan City, Samar

June 2015 - December 2020

## CERTIFICATIONS

---

AWS Certified Solutions Architect | [Credentials](#)

AWS Developer | [Credentials](#)

## PROJECTS

---

### Static website on AWS S3 with CloudFront | [GitHub](#)

Built and deployed a static portfolio website on AWS using Amazon S3 for hosting and Amazon CloudFront for global content delivery, enabling secure, scalable, and low-latency website access.

### CI/CD Pipeline for AWS Fargate with GitHub Actions | [GitHub](#)

Implemented a CI/CD pipeline for containerized applications on AWS Fargate using GitHub Actions, automating Docker image builds, ECR pushes, ECS deployments, and rolling updates through secure GitHub OIDC authentication.

### IaC: Terraform State Management | [GitHub](#)

Designed a robust Terraform state management strategy using remote backends and locking mechanisms to ensure consistency and collaboration in infrastructure provisioning.
